

Project Design Phase

Problem - Solution Fit Canvas

Date	05 July 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	2 Marks

1. CUSTOMER SEGMENT(S) Governments, policymakers, researchers, NGOs, students studying human development.	6. CUSTOMER CONSTRAINTS HDI data is scattered, manual analysis is slow, and combining multiple indicators is difficult.	5. AVAILABLE SOLUTIONS UNDP reports, spreadsheets, statistical analysis, and manual comparison of countries.
2. JOBS-TO-BE-DONE / PROBLEMS Predict HDI category accurately and identify development gaps for better decision-making.	9. PROBLEM ROOT CAUSE Health, education and income indicators are analyzed separately, making interpretation difficult.	7. BEHAVIOUR Users collect datasets, compare countries, and manually estimate development levels.
3. TRIGGERS Need for quick HDI prediction, policy planning, academic research, and development assessment.	10. YOUR SOLUTION An AI/ML-based HDI prediction system using Life Expectancy, Mean Years of Schooling, Expected Years of Schooling and GNI per capita.	8. CHANNELS OF BEHAVIOUR Online: Government portals, UNDP, World Bank, web app. Offline: Research reports, policy meetings, academic discussions.
4. EMOTIONS: BEFORE / AFTER Before: Confused, time-consuming analysis. After: Clear insights, confidence, faster decisions.
