

Project Design Phase

Problem - Solution Fit Template

Date	05 July 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	2 Marks

Problem - Solution Fit Template

The solution predicts Human Development Index (HDI) categories using machine learning to help governments, researchers and policymakers evaluate development and identify improvement areas.

1. Customer Segment(s) Governments, Policymakers, Researchers, NGOs, Students	2. Customer Constraints Manual HDI analysis is slow and requires combining multiple socio-economic indicators.
3. Triggers Need for faster evidence-based development decisions.	4. Emotions Before/After Before: Confused, time-consuming. After: Confident, informed.
5. Available Solutions Manual reports, spreadsheets, statistical analysis.	6. Jobs-To-Be-Done / Problems Predict HDI category and identify development gaps.
7. Problem Root Cause Indicators are scattered and difficult to interpret together.	8. Behaviour Users compare countries and analyze trends manually.
9. Your Solution AI-based HDI prediction using Life Expectancy, Education and GNI with instant results.	10. Channels of Behaviour Web application, research reports, government portals.
