

Project Design Phase

Proposed Solution Template

Date	05 July 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1	Problem Statement (Problem to be solved)	Accurately assessing a country's Human Development Index (HDI) is difficult because health, education, and income indicators must be analyzed together. Manual analysis is time-consuming and may delay policy decisions.
2	Idea / Solution description	Develop a Machine Learning-based HDI prediction system that uses Life Expectancy, Mean Years of Schooling, Expected Years of Schooling, and GNI per capita to predict the HDI category (Very High, High, Medium, or Low) and provide decision-support insights.
3	Novelty / Uniqueness	Integrates multiple socio-economic indicators into a single AI-based prediction model with fast, accurate, and user-friendly analysis for researchers and policymakers.
4	Social Impact /	Helps governments,

	Customer Satisfaction	NGOs, and researchers identify development gaps, improve resource allocation, and support evidence-based policy making, leading to improved public welfare.
5	Business Model (Revenue Model)	Freemium web platform for public users, subscription plans for organizations and research institutions, and analytics services for government agencies.
6	Scalability of the Solution	The system can be expanded with additional socio-economic indicators, larger global datasets, real-time data integration, multilingual support, and cloud deployment.
