

Ideation PhaseBrainstorm & Idea Prioritization Template

Date	04 July 2026
Team ID	
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a collaborative environment to generate innovative solutions. For this project, the team focused on predicting the Human Development Index (HDI) using Life Expectancy, Mean Years of Schooling, Expected Years of Schooling, and GNI per capita.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Selected Problem Statement:

Governments, researchers, and policymakers need an intelligent system to accurately predict the Human Development Index (HDI) category and identify development gaps using key socio-economic indicators.

Step-2: Brainstorm, Idea Listing and Grouping

- 1. Collect HDI dataset from UNDP/World Bank.
- 2. Preprocess and clean missing values.
- 3. Train ML classification models.
- 4. Compare algorithms for best accuracy.
- 5. Visualize relationships among indicators.
- 6. Predict HDI category (Very High, High, Medium, Low).
- 7. Provide recommendations for development improvement.
- 8. Develop a user-friendly prediction interface.

Step-3: Idea Prioritization

Idea	Importance	Feasibility	Priority
Machine Learning based HDI Prediction System	Very High	High	1

Reason for Selection:

This idea provides accurate HDI prediction, identifies development gaps, and supports evidence-based policy decisions.
