

Ideation Phase

Define the Problem Statements

Date: 4 January 2025

Project Name: A Comprehensive Measure of Well-Being

Maximum Marks: 2 Marks

Customer Problem Statements

The project predicts the Human Development Index (HDI) category using Life Expectancy, Mean Years of Schooling, Expected Years of Schooling, and Gross National Income (GNI) per capita. The goal is to help governments, researchers, and policymakers evaluate human development and identify areas that need improvement.

Problem Statement	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A Policymaker	Assess a country's HDI level and plan development policies	Analyzing health, education, and income indicators together is difficult	The indicators come from different sources and require complex analysis	Uncertain about making effective policy decisions
PS-2	A Researcher / Student	Predict a country's HDI category accurately	It is hard to understand the combined impact of multiple development indicators	There is no simple AI-based tool for quick HDI prediction	Confused while comparing countries and identifying development gaps
